

COMMISSION SEMI

**To all the members
of the FIE SEMI COMMISSION**

**To Mr. Jacek Bierkowski
COMEX's Representative at the SEMI**

Subject : Carmimari breeches-instruction for weapon controllers

Torino, March 20th, 2017

CARMIMARI both model of breeches, DUELLIST and BLADE MASTER

Valid until the end of the season 2016/2017

both models are not correct and has a 7.5cm wide waist band made only of elastic which will not be of the same strength. This must put these breeches in contravention of article m.25.3.c which states that "clothing must be made entirely of cloth able to resist a pressure of 800 Newton."

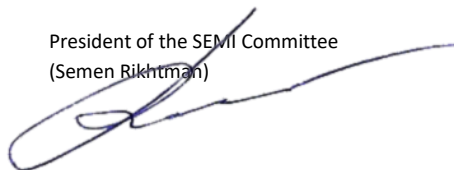

You can actually find these situations:

- ▶ New production of breeches with the waist band in protective fabric **OK**
- ▶ Old Breeches but with the waist band in protective fabric (Carmimari changed the old elastic band with a new one in protective fabric) **OK**
- ▶ Old breeches with elastic waist band. In this case the fencer have to wear under the elastic band a e belt in protective fabric (12 cm high) With protective band **OK**
Without protective band **NO**

We remain available for further clarifications.

Yours faithfully

President of the SEMI Committee
(Semen Rikhtman)

SEMI in charge for the CCO
(Giandomenico Varallo)
